Court Management software for New York State Justice Courts

Three factors make us the leader in court software...

Quality

Quality comes from the dedication and skills of the programming, support, installation and marketing staffs...

With over 25 years of experience and over 1175 installations, we implement our customer's suggestions to make a better product. We sponsor user group meetings to hear your feedback as we demonstrate recent changes.

With the Office of Court Administration's approved vendor seal, you are assured that SEi and The CourtRoom Program meet the expectations of the OCA.

One indication of our commitment to quality is the customer list we give to prospective clients. Who better than our current customers to tell you about our product and service?

Our annual license/maintenance support program entitles you to 25 hours of telephone help, program updates and documentation updates that occur during the year. While mandated updates are sent automatically, we will send routine updates as often as you request.

Service

Installation and training are available Monday- Friday at your convenience.

Based on the training option you choose, we can come back to help with your first audit/control report, answer your questions and do advanced topic training.

You may also purchase CourtRoom Program® training for up to 3 people, at our Penfield, NY office, 10 minutes east of Rochester.

You work evenings and weekends and we do too! We answer your calls for *emergency* assistance until 10:00 PM and on weekends.
